

# Blu-Gard

Concentrated teat spray or dip

## PRODUCT DESCRIPTION

A non-iodine teat sanitiser that provides broad-spectrum activity to aid in the control of mastitis in dairy cows, as well as a very high emollient concentration to aid in the prevention and healing of cracked and chapped teats.

Its regular use will reduce the incidence of new infections by controlling the number of mastitis producing organisms on the teat.

This activity persists between milkings.

## FEATURES & BENEFITS

- Identifiable blue liquid concentrate may be used by dipping or spraying.
- Non-iodine formula.
- **Blu-Gard** has no offensive odours, is non-irritating and non-toxic at recommended dilution.
- Contains no oxidising agents. **Blu-Gard** is not corrosive and has substantial tolerance to organic matter.
- **Blu-Gard** is buffered to maintain broad-spectrum germicidal activity even in varying water conditions.
- Unlike Iodine, **Blu-Gard** does not lose its potency within short periods. Pre-mixed solutions can be stored.
- **Blu-Gard's** clinging nature ensures extended residual germicidal activity after spraying or dipping.
- Acceptance in many dairying countries including New Zealand, England, France, Canada, Sweden and the United States.

## PROPERTIES

Appearance:	Blue liquid
pH (undiluted):	4-5
Specific gravity:	1.18-1.20
Active Ingredient:	Linear dodecylbenzenesulfonic acid

# Blu-Gard

Concentrated teat spray or dip

---

## TO USE

### Spray or Dip Application:

Dilute one (1) part of **Blu-Gard** with four (4) parts water. Use this solution as a spray or a dip immediately after milking. Wash residues from teats and udder and ensure they are properly dried before milking.

Do not return unused mixture to original container.

---

## APPROVALS

NRA Approval No.: 45899/0802

---

## SAFETY DIRECTIONS

For cautionary and first aid information, consult the Material Safety Data Sheet (MSDS) or product label.
