

# Fact Sheet

## Dairy Chlor 12.5% Concentrated Sodium Hypochlorite

### DESCRIPTION

**Dairy Chlor 12.5%** is liquid sodium hypochlorite with active constituent 125g/L available chlorine. It is a very powerful disinfectant which will not leave a taint or odour on contact surfaces when used as directed.

**Dairy Chlor 12.5%** is most effective on physically clean surfaces since organic matter reduces its power.

**Dairy Chlor 12.5%** is a clear, yellow-green, mobile liquid with an odour of chlorine.

### FEATURES AND BENEFITS

- Easy to use, does not leave residues, is virtually colourless, non-staining and economical
- Is a proven sanitiser for use in the household, food industry, hospitals and water treatment
- Solutions exhibit a broad range of antimicrobial activity at relatively low concentrations
- Completely soluble in water

### DIRECTIONS FOR USE

**Dairy Chlor 12.5%** is completely soluble in water. Always add **Dairy Chlor 12.5%** to fresh water and stir.

Solutions must not be mixed with acids or other chemicals since they may lose their effectiveness or evolve toxic fumes.

Concentrations at which **Dairy Chlor 12.5%** solutions are used differ depending on the application. For best sanitation results use **Dairy Chlor 12.5%** on clean surfaces.

### GENERAL HARD SURFACE DISINFECTION

Use 1 to 3mls of **Dairy Chlor 12.5%** per litre of water. For chlorination of pool water use 80mls of **Dairy Chlor 12.5%** per 20000 litres of water.

Always rinse all utensils used for mixing **Dairy Chlor 12.5%** solutions immediately after use.

### STORAGE CONDITIONS

Product contains Sodium Hypochlorite.

Exposure to elevated temperatures or direct sunlight can reduce the product shelf-life and activity.

### PACKAGING

25 litre drum	P/C 26573
200 litre drum	P/C 26599
1000 litre IBC	P/C 21670

### SAFETY INFORMATION

Carefully read the Material Safety Data Sheet (MSDS) before using this product. For your convenience, MSDS's can be accessed on [www.cleantec.com.au](http://www.cleantec.com.au).
